

Mobility and quality have now become *one*. The new HEINE DELTAone Dermatoscope.

Small on the outside, big on the inside – this mobile masterpiece is taking medical professionals by storm. The crystal-clear image was accomplished using the new achromatic HEINE optical system. What's more, it produces extraordinary colour rendering, due to the quality of our LEDHQ.

Examinations are now particularly comfortable due to the polarisation allowing doctors to work glare-free and without disrupting reflections. These three features – clarity, LEDHQ and non-reflective working – are what turn the DELTAone into a vital tool to carry in your pocket wherever you go.
